

VENDING MACHINES FOR PERSONAL PROTECTIVE EQUIPMENT DISTRIBUTION

PPE - Masks and other Personal Protective Equipment

- Employee protection through automated mask and other PPE distribution.
- 24/7 availability at strategic workplace locations.
- Easy and traceable unattended distribution.
- Consumption Control.

Is your
business
equipped
to counter
COVID-19?

Melodia vending machine is the safest and most efficient solution to protect your employees.

Capacity and Configuration

- Multi product vending machine designed to distribute masks and other PPE items.
- Layout: up to 6 trays and 6 spirals per tray, configurable according to requirements of the location.
- Variable capacity from 288 to 396 items, dependent upon product packaging and mix.
- Plastic trays ensure maximum durability and optimum hygiene.

Positioning, installation and programming

- Compact dimensions: one or more machines can be easily installed in strategic workplace locations.
- Free standing, plug and play machines, ready to operate where they are most needed.
- Customisable programming with single-user access cards, which allocate the PPE required per individual over a specific period of time.
- Programmable access to the vending machine:
 - 24/7 option: allows product dispensing at any time, avoiding people gathering whilst waiting to use the vending machine.
 - Programmable option: restricts use of the dispensers to specific user-defined time slots.

Machine Management & Consumption Control

- The consumption control system allows the use of the machine by each individual employee to be monitored through their personal card.
- Distribution is monitored by an infra red system located in the delivery bin.
- Each employee's consumption data is retrievable and can be stored or uploaded to the company ERP.
- A pull out delivery bin simplifies both product collection and machine cleaning.
- The machine has a capacitive keyboard and functional display.
- LED lighting ensures excellent product visibility.

We will assist you to customise, program and install your machines so that they can be put to use without delay.

The product display area is equipped with a security lock and LED lighting.

Control and monitor each employee's consumption through their card.

Pull out delivery bin, ergonomic and hygienic.
